

Powerscreen Speedharps

Nov.'06

Powerscreen are continually improving their products have made several improvements to their Speedharp range making them one of the best products on the market. Powerscreen Speedharps not only fit Powerscreen products but any screening machine.

Contact your local Powerscreen Dealer to find out about Powerscreen Speedharps or phone: +44 (0) 28 8774 0701.

Hook Strength

The hook plate is now stronger and is 33% thicker which improves tension and life expectancy of the screen.

Hook Shape

The hook is easier to fit into the screen reducing down time. The hook now has a depth below 50mm tolerance and the centre section is 20mm allowing heavy duty tension bars to be fitted where required and this improves tension and life expectancy of the screen.

Wire

The wire in a Powerscreen Speedharp has a higher tensile strength compared to competitors.

Quality Assurance

Powerscreen have a 5 stage quality check system during the manufacture of all Powerscreen Speedharps.

Packaging

The heavy duty packaging ensures that Powerscreen Speedharps arrive to our customers in perfect condition - no matter where you are in the world.

Profiles

Powerscreen supply both metal and plastic (round and square) profiles. The round plastic profile sits neatly on the cushion rubber and the square profile fits directly over the existing crossbars.
